PERSONAL PROJECTS

Portfolio Website Using HTML, CSS, JavaScript (07/2021 - 08/2021)

▣ Software used:-VSCode Language used HTML, CSS, JavaScript

GSM Based SMS Alerts Fire Alarm System Using Arduino (09/2020 - 11/2020)

▣ Software used :- Proteus 8.6 and Arduino Ide Language used C++ SMS based Fire detection system using Smoke and Temperature sensor has applications in many areas like Industries, Companies, Offices, Shopping malls and even at our home. This project has a Smoke sensor and a temperature sensor to detect the fire. The fire detection system sends SMS to the user when anyone these sensor crosses threshold value. We have provided a Buzzer which turns on when SMS is sent to the user
